

Our brighter economic future

Getting Financial Control Simple methods to save cash

More businesses fail from a lack of cash rather than a lack of profit. Learn how to be better prepared for the peaks and troughs of the economic business cycle. This session will demonstrate how to prepare a cash-flow forecast and provide you with tips to increase cash-flows in your business. Sandy Riba will provide you with some simple methods to implement better systems and controls to minimise the risk of fraud.

Due to the content covered in this presentation, business owners who are registered for GST who prepare a complete set of financial accounts in-house, or are comfortable reading and understanding their financial statements should attend.
